

IP INTERCOM ENSURES EASY AND FRICTIONLESS ACCESS FOR PASŁĘCKA 14, POLAND

THE SITUATION:

A newly built, small, intimate building with 26 high-standard apartments. It features two staircases and two passages with access control between the underground garage and the staircases.

TYPE OF SITE:

Apartment Building

LOCATION:

Pasłęcka 14, Warszawa, Poland

THE SOLUTION:

Limited apartments often signify a sense of exclusivity and high-end living. DNAKE IP video intercom solution delivers both security and convenience for modern residential living. The 902D-B6 offers a hands-free and contactless entry experience. Access control is installed at entry points between the underground garage and staircases to enhance security. Residents can unlock doors using both the E216 indoor monitor and the mobile application.
