

DNAKE Cloud Platform Release Notes of Version

1.6.0

1. Introduction

In this update, we introduce three major features: a more convenient device deployment process, a simpler app registration procedure, and enhanced access control management, along with over a dozen new features and optimizations.

- Cloud Platform Version: 1.5.1 to 1.6.0
- Applicable Model and Firmware:

Type	Model	Firmware
Door	S213K	280D(B18)_0_1_4_4_CloudV1_6_10_GA_20240829.img
	S617	904D_0_1_5_10_SIPV1_6_11_GA_20240830.img
Station	S215	Will available in 2024/9/5
	C112	Will available in 2024/9/13
	S615	Will available in 2024/9/30
Indoor	H618	904(A10)M_0_1_3_28_CloudV1_5_17_GA_20240830.img
Monitor	A416/E416	907M_0_1_3_27_CloudV1_3_36_GA_20240830.img

2. New Features

- Support for devices to automatically connect to the cloud platform
- Support for configuring device relays via the cloud platform
- Support for rebooting devices via the cloud platform

- Support for configuring device daylight saving time via the cloud platform
- Brand new access control management solution
- Brand new package room solution
- Support for residents to register accounts by scanning the QR code on indoor monitor with the app
- Support for bulk creation of residents by property manager
- Support for receiving door station calls when the app is in the background
- Support for viewing operation logs on the cloud platform
- Support playback IP address by long press ring button for devices without screens

3. Optimization

- Optimize device number limitations
- Improve the experience of adding and deleting devices
- Optimize the display of landline calls
- Enhance the resident management menu on the cloud platform
- Improve the display of unlock records on the cloud platform
- Optimize the display of user nicknames in the app
- Enhance the experience when exiting door station monitoring
- Enabling DHCP function by default

4. Bug Fixes.

- Fix some bugs
